

# FLEXI-BATCH MICRO MODULE

---

FAST & ACCURATE FORMULATION  
OF MICRO INGREDIENTS.

Automatically formulate  
micro & minor ingredients using  
pre-programmed recipes.

## Fast, efficient formulation of micro ingredients

Achieve accurate dispensing of micro volumes

If you find that preparing the micro & minor ingredients for a recipe batch is time-consuming and prone to error then this could be the answer.

### MICRO FORMULATION MODULE

Ideal for accurate dispensing of micro & minor ingredients

Automated batching – removing the risk of error

Reduce time spent in weighing & formulating recipes

Fast changeover of bottles – refill offline

Originally designed for the Bakery industry, this micro dosing module now has a wider portfolio of uses and can be deployed for any minor or micro ingredients.

### Improve accuracy in weighing micro ingredients

Flexibility to deliver multiple recipes from the 10 ingredient containers on the carousel.

Reduce time spent in weighing the micro & minor ingredients for every recipe.

Improve accuracy the automated programming will dispense just the right amount of ingredient.

Improve manufacturing efficiency rates as the recipes can be formulated off-line and brought into production as a single dose of micros.

Fast changeover of ingredients as each bottle can be filled offline and reloaded as needed.

POWDERS, HANDLED.

We specialise in providing complete materials handling solutions in the Food, Nutrition, Pharmaceutical and Chemical sectors.

We're not just an IBC provider, but a true partner helping you accomplish the right system for your needs.
